Professional Experience

FULL-STACK DEVELOPER (REMOTE)

JETSWEAT LLC, NEW YORK, NY | JANUARY 2021 - PRESENT

- Optimized the site's load time by 15% by deprecating unused third-party libraries, optimizing images, removing unused React and CSS code.
- Create, redesign, and refactor numerous React components for performance optimization across a vast array of web-capable devices and browsers.
- Implement Redux with Redux-Saga middleware to handle predictable asynchronous code.
- Fix back-end features built in Node.js to correctly display and organize user data for 30+ active fitness studios.
- Reduce technical debt by 10% due to performing bug fixes and code reviews.
- Collaborate with a team of 5 web developers in a proper git workflow.

SOFTWARE DEVELOPER INTERN (REMOTE)

ADMIT GURU, PALO ALTO, CA | DECEMBER 2020 - MARCH 2021

- Developed and launched a React marketing website from scratch with interactive features to optimize user experience.
- Utilized AWS Amplify to produce serverless back-end APIs to create a waitlist, email subscription, and contact form.
- Integrated Google Analytics and google tag manager for event tracking.
- Implemented third-party React libraries (react-responsive-carousel, react-beautiful-dnd, etc.) for building carousels, animations, and drag and drop functionalities.
- Increased web traffic by 45% by improving navigation, creating dynamic media sections, and optimizing web content.
- Reduced largest contentful paint by 55% by running web performance tests to identify opportunities to speed up the application.

WEB DESIGNER INTERN (REMOTE)

MUSIC JUNCTION, BURBANK, CA | NOVEMBER 2020 - MARCH 2021

- Designed and developed online landing pages that increased customer traffic by 1000+ visitors per month.
- Created minimalistic and responsive web pages while optimizing content to enhance the customer experience.
- Coordinated with a marketing specialist to incorporate brand elements and relevant market research findings into web pages that led to a 15% increase in visitor retention.

FRONT-END DEVELOPER INTERN (REMOTE)

ATOMIC, LOS ANGELES, CA | JULY 2020 - JAN 2021

- Built thoughtful modules and components, keeping in mind maintainability, reusability, and compatibility with the existing architecture of their SaaS Startup Company.
- Translated designs & wireframes into high-quality code and wrote application interface code following React.js workflows.
- Utilized chrome debugger, react developer tools and redux debugger tools for development and debugging.
- Optimized design for 7 screen sizes (desktop and mobile using flexbox and media queries).

Personal Projects

Streaming Service Clone (Click [here](#) for live demo)

- Built front end app with Next.js for the front-end and utilized the Context API to share data across all levels of the application.
- Constructed a filter feature that queries and tabulates data from an API based on user search parameters.
